

Fall 2023 Biological Sciences Seminar		
Day/Month/Year	Speaker	Tenatative Title or topic area
August 25th	TBD & Andrea James	First Day of seminar- intro & (n)ettiquette
September 1st	UNC Undergraduate Researchers	UG Research Showcase- Rebecca Phelps, Cheyenne Smith, Rey Ramos
September 8th	Dr. Jennifer Avena- UNC	Engaging Students in Biology: Problem Solving, Learning Assistants, Utility Value, and Programming
September 15th	Dr. Charles Lenell- UNC	Hormones and the Voice
September 22nd	Dr .Wendy Estes Zumph- WY department of Wildlife	TBD
September 29th	Raj Kumar- CU Anschutz	Mouse models to study evolution of gonadotropin secretion patterns and ovarian function
October 6th	TBD	TBD
October 13th	TBD	TBD
October 20th	Sam Kerwin (soon to be) MS	V-ATPase Inhibition and Their Role in Preserving Venom Functionality During Storage and Production
October 27th	Logan Bauerle (soon to be) MS	Factors influencing AhR mediated control of chemokine receptor 9 expression: the role of biological sex and timing of AHR/immune activation
November 3rd	Raznin Joly (soon to be) MS	Investigating the Therapeutic Potential of Cannabigerol (CBG) in Female NASH Mouse Models
November 10th	Dr. Holger Petermann Denver Museum of Nature & Science	TBD
November 17th	Cole Grannan, MS	TBD
November 24th	Happy Thanksgiving!!!!	
December 1st	Nikki Farnsworth- Colorado School of Mines	The Role of the Pancreas Microenvironment in Regulating Islet Function and Survival in Type 1 Diabetes

## Notes for Faculty

End at 4:25PM

End at 4:25PM

End at 4:25PM

End at 4:25PM

Staying for happy hour- excited for student interaction

Staying for happy hour- excited for student interaction

Awaiting confirmation

Awaiting confirmation

Defense- plan for extended Q&A session

Defense- plan for extended Q&A session

Defense- plan for extended Q&A session

Awaiting confirmation

End at 4:25PM (Would have already defended before 'last day to defend' - giving public talk)

Sleepy nom noms

Staying for happy hour- excited for student interaction
