Dear Faculty Members,

As we continue to navigate the ever-evolving landscape of higher education, it is crucial that we stay informed about emerging technologies and their influences on our environment. With this in mind, we have partnered with IDD to develop an **informational flyer** about **Generative Artificial Intelligence (AI)** and its potential impact on teaching and learning.

We encourage faculty members to clearly communicate their policies regarding the use of AI-generated content in their course syllabi. Sample AI syllabus statements are available on the **CETL's Syllabus Statements** webpage.

By establishing protocols in your classes regarding the use of AI tools, you can help ensure a fair and transparent learning environment for all students. Whether you choose to embrace these tools, restrict their use, or offer guidelines on their ethical application, your guidance will play an important role in shaping students' academic experiences.

Regards,
Kirsty
